

DSA Sheet Consistency & 60-90 Day Execution Plan

How to Systematically Master 75 Core + Full DSA Sheet starting Sept 22

1. The Core Philosophy: Pattern Over Memory

Do not attempt to memorize solutions. Focus on **Pattern Recognition**. Once you recognize why a problem belongs to *HashMap + Prefix Sum* or *Monotonic Stack*, you can solve 10 similar unseen problems easily.

DAILY CONSISTENCY PROTOCOL

The Daily 2.5-Hour Non-Negotiable Routine:

- **30 Mins:** Review previous day's problem notes & mental models.
- **60 Mins:** Solve 2 fresh problems from the target topic.
- **30 Mins:** If stuck > 25 mins, read editorial/pattern hint, code yourself, write note in app.
- **30 Mins:** Maintain your active streak on your custom React DSA Tracker!

2. Month-by-Month Topic Breakdown

Phase & Timeline	Focus Topics & Core Patterns	Target Problems
Phase 1 Weeks 1 - 3 (Sept 22 - Oct 12)	Arrays, Strings & Stacks Two Pointers, Sliding Window, Prefix Sum, Kadane, Monotonic Stack progression (20→496→739→503→84→85).	Array (32) String (30) Stack (14) ~76 Problems
Phase 2 Weeks 4 - 6 (Oct 13 - Nov 02)	Linked Lists, Trees & Heaps Fast/Slow pointers, Tree DFS/BFS, BST property, Tree DP, Top K elements, Two Heaps.	Queue/Heap (13) Linked List (15) Tree (23) ~51 Problems
Phase 3 Weeks 7 - 9 (Nov 03 - Nov 23)	Graphs, DP & Backtracking Grid DFS/BFS, Topological Sort, Union Find, Dijkstra, 1D/2D DP, Knapsack, Decision trees.	Graph (23) DP (31) Backtracking (20) ~74 Problems
Phase 4 Final Weeks (Nov 24 - Dec 15)	Core 75 Mastery & Mock Contests Re-solve Core 75 timed (20 mins/medium), practice mock interviews.	Core 75 Revision Mock Tests

3. Handling 7th Semester Exams Gap

When your 7th semester exams start (2-3 weeks gap):

1. **Do NOT drop streak to zero:** Solve just 1 easy problem daily (15 mins) to keep the streak & mental inertia active.
2. **Use Flashcards / Mental Models:** Review the *Patterns & Guides* tab in your app during exam breaks.
3. **Immediate Recovery:** Resume 2.5-hour schedule right on the last day of exams.
